

Fall 2020

Applied quantitative Methods for Non-quantitative doctoral researchers

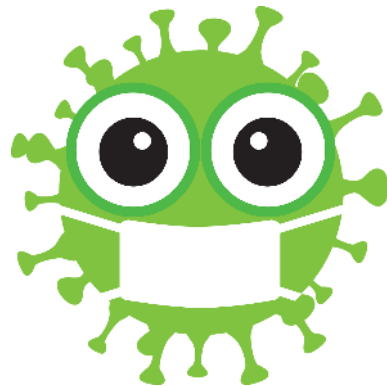

Session 07: Handling data in STATA

Charles Tackney¹, Jan Bauer¹ & Manuele Citi²

¹Department of Management, Society & Communication

²Department of Business & Politics

Copenhagen Business School

The software

STATA

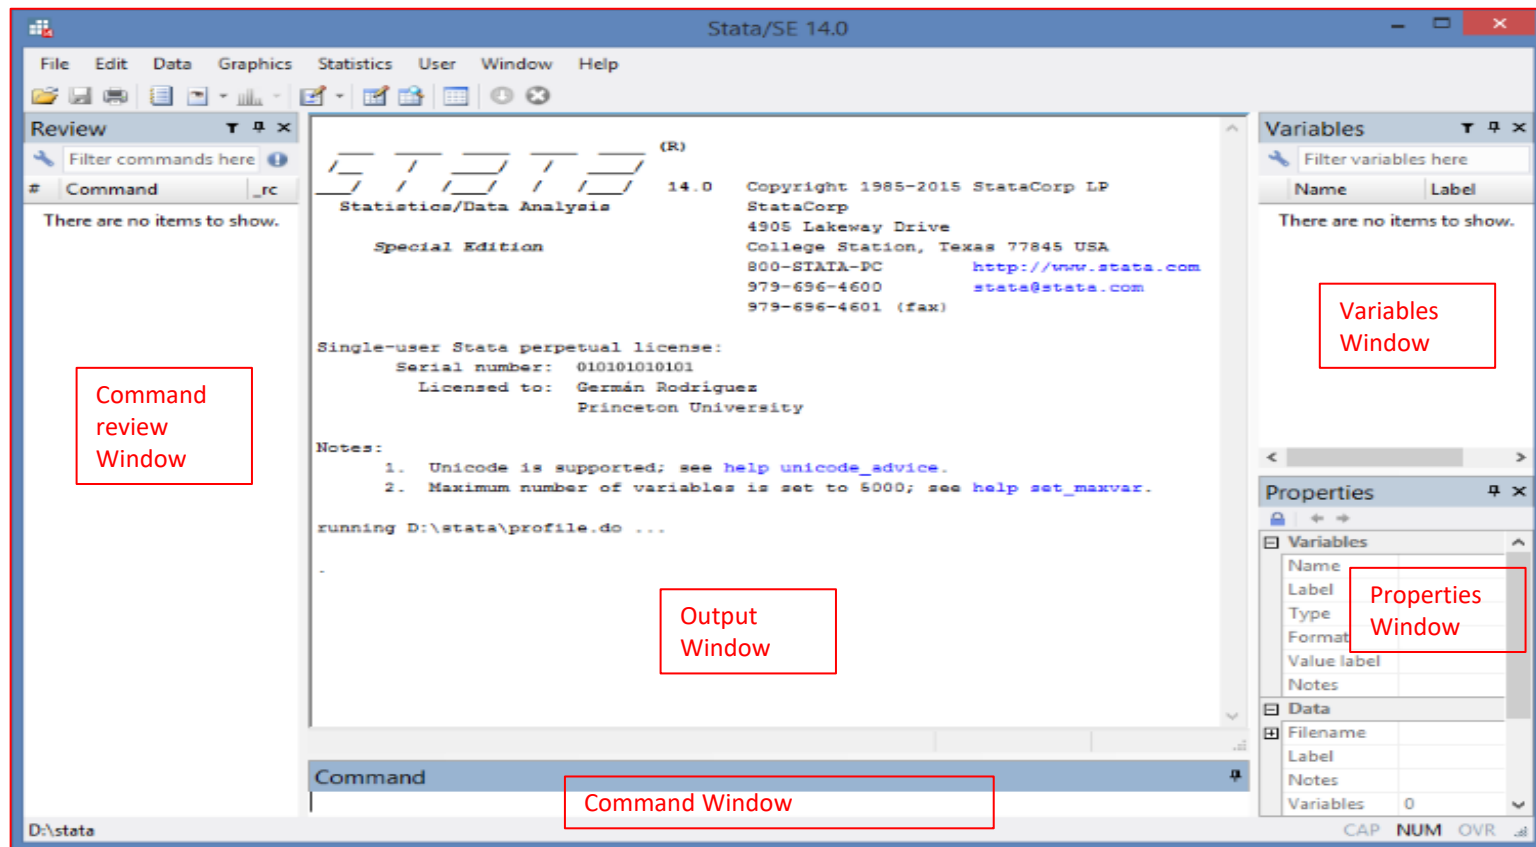

- Available for Windows, Unix, Mac
Hardware requirements: moderate
- Different version according to needs:

Compare features

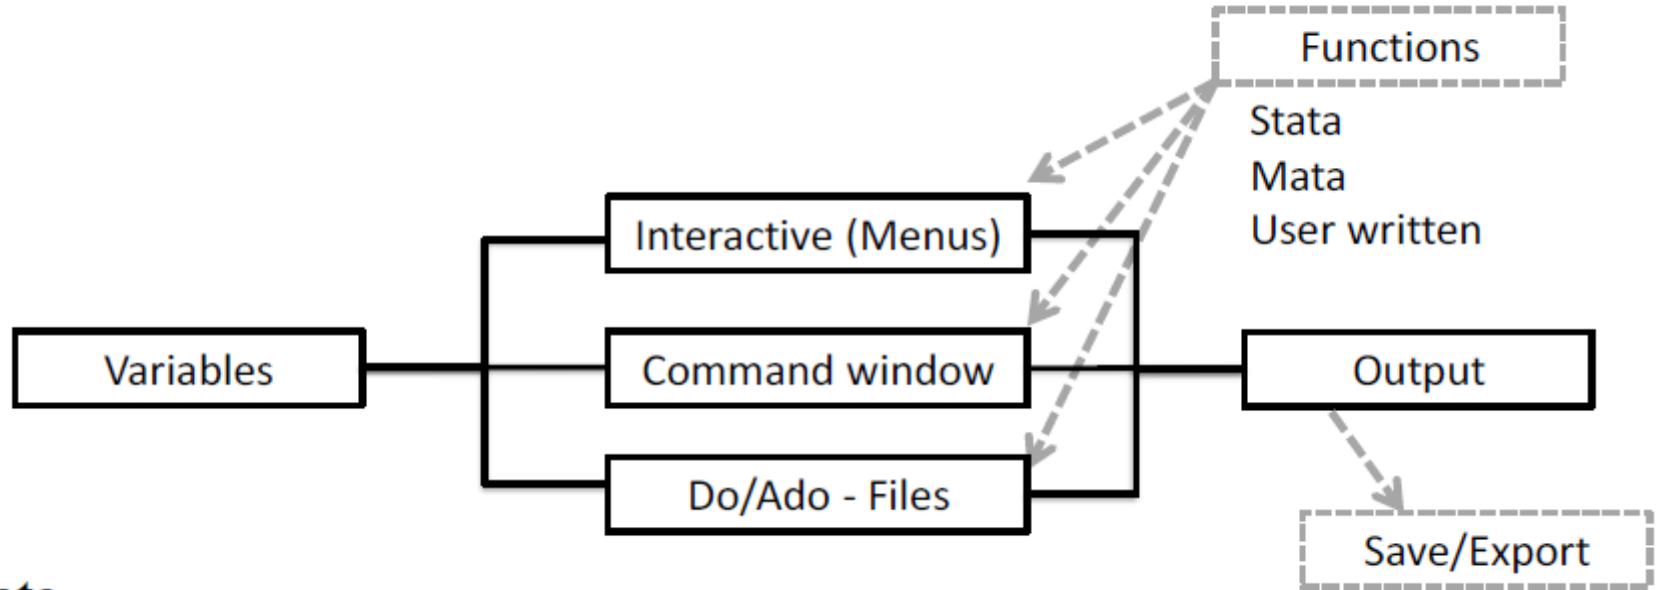

Package	Max. Var.	Max. Ind. Var.	Max. Obs.	64-bit vers. Available?	Parallel processing?	Platforms
Stata MP	32,767	10,998	20 billion*	Yes	Yes	Win Mac, Unix
Stata SE	32,767	10,998	2.14 billion*	Yes	No	Win, Mac, Unix
Stata IC	2,047	798	2.14 billion*	Yes	No	Win, Mac, Unix
Small Stata	99	98	1,200	Yes	No	Win, Mac, Unix

*The maximum number of observations is limited only by the amount of available RAM on your system

STATA

STATA

in Stata

STATA – Load, import, and combine data

Most important functions/commands for data management

- use – load stata datafile *.dta
- import – import data from other sources
- append – add **observations** to the data set
- merge – add **variables** to a data set
- save – save the current data set as *.dta

id	age	income
1	23	40000
2	45	23000
3	64	34000
4	34	54000
5	22	23000
6	32	43500
7	43	65000
8	65	120000
9	76	32000
10	45	45000
11	32	560000

Let's have a look

The end...

Furthermore, I consider that we must do more to reduce human impact on the environment.

... might be near!
